

Duration:  
**October 2018-March 2019**

Total budget of the project:  
**€ 12.000**

Regional funding:  
**€ 8.400,00**

## Guidance and information path for young people on European funding programmes and opportunities

### OBJECTIVE

The project involved **30 young people** from the Union of Municipalities of the Valle del Savio and it was characterized by the implementation of a practical **course on euro-planning techniques** and an **informative and publicity video** on the financing opportunities that the European Union has provided to the territory of the Union.

In particular, the project had the goal to reinforce the sense of European citizenship in the new generations and encourage the growth of an awareness of Europe to make the young protagonists and users of the opportunities deriving from their being European citizens.

The intent was to stimulate active participation and to invest in the knowledge of the processes that govern the formulation and implementation of European policies, the impact that these policies have on the life of local communities and on strengthening the capacity of the community in their various components of citizens, businesses, institutions, associations.

The aim of the initiative was therefore to combine more technical training on the use of European funding instruments with education for European citizenship and to provide an overview of projects already financed and implemented on the territory.

### ACTIVITIES

The activities involved in the project were:

#### 1. European citizenship education and information course and euro-planning basics.

The course was structured in **4 training modules of 3 hours each (12 hours total)** and it included lectures, design workshops and group practical exercises. From the laboratories a project idea was selected, which will have the right to an accompanying and follow-up path for the preparation of a European project for the Valle Savio Union.

#### 2. Informative and publicity video on the financing opportunities that the European Union has provided to the territory of the Union.

The aim of the video was to tell citizens about the different projects that have taken place in the Union thanks to European and regional funding to raise awareness among the people of the Valle del Savio Union about the concept of European public good and the investments made on the territory.

During the course (activity nr. 1) teaching materials were provided and at the end it was released a certificate participation that can be included in CVs as a professionalizing experience in the field of European planning.
