Environmental and tourist redevelopment of the wet area of Quarto Lake.

OBJECTIVE

The project aims to redevelop from a naturalistic-environmental point of view the wet area of Lake Quarto located within the territory of the Union of Valle del Savio Municipalities and in particular within the Municipalities of Sarsina and Bagno di Romagna. The intervention intends to increase the attractiveness and economic development of the internal areas.

ACTIONS

The project includes integrated interventions for the redevelopment of the wetland through the enhancement of the naturalistic component and the definition of new structures and tourist routes of use also connected to the wider landscape and cultural context of the Savio valley:

1. recovery and safety of the existing paths and connection with the regional network of paths (path of San Vicinio, Via Dei Romei);
2. creation of a new thematic itinerary;
3. creation of an educational classroom and equipped area for school groups;
4. construction of piers for mooring canoes / pedal boats and new rental service;
5. creation of posters and signs and informative and promotional material;
6. creation of an APP and a tourist web portal.

EXPECTED RESULTS

1. Qualification and diversification of the tourist offer (thermal, environmental, cultural, hiking, food and wine, etc.);
2. Creation of integrated and innovative tourist routes to attract new flows of tourists;
3. Economic development and increased competitiveness of the mountain territory of the Union;
4. Protection and enhancement of areas of widespread environmental, historical and cultural value.
